

Product Specification – High Security Cages

Security Cages – Heavy Duty

Our High Security Cages are the choice of the highstreet retailers and have been widely used to protect their most valuable items of stock.

The High Security Cages have been used to protect a wide range of valuable items from mobile phones ,computer gaming equipment and contraband items. The cages are based on a standard 2.0m height with a varying depth and width. All the cages are of a modular design with fully welded 5mm thick panels which are delivered palletised for assembly on site . Once assembled the cage will resist the most determined of attacks.

The panels are filled with 3mm Steel square mesh to give the user the convenience of high visibility without compromising security.

The steel 1m wide door has a Mortice Deadlock with a steel panel shielding the mechanism to prevent tampering with the lock. The door is positioned on the 2.6m face.

Our cages are attractively finished in Black paint
