

External Security Cages

This best selling range of robust steel storage cages gives a highly secure method of storing your valuable items. Steel mesh panels will resist the most determined vandal or criminal attack

Our cages have either a single or double hinged lockable door with a steel staple and hasp closure compatible with all security padlocks.

Our powder coated and galvanised cages are all totally weatherproof to enable you to site them where you wish.

A modular design mean you can extend your existing cages by simply ordering further panels offering you the flexibility you need as your needs develop.

Cage Panels include floor fixing plates for additional security.

Larger units are delivered Flat pack for easy on-site assembly , all bolts and fastenings are provided including external shear security bolts.

Optional shelves are also available for smaller cages for maximising the use of the storage space.
